**Natus Medical's Olympic Brainz Monitor Announced as Finalist for
TechAmerica Foundation's American Technology Awards**

San Carlos, CA –Natus Medical Incorporated today announced that the Olympic Brainz Monitor (CFM) has been selected as a finalist in the Health & Medical Technologies for TechAmerica Foundation's American Technology Awards, "The Termans", which bestows the only national "Best Of" awards that recognize all technology products and services across the technology industry. Nominations for The American Technology Awards, "The Termans", were vetted by industry experts and TechAmerica Foundation leadership. These awards were named after Frederick Terman, who is widely credited as being the father of Silicon Valley.

Lisa Burque, Sr. Director of Marketing stated that "Natus is proud to receive this **nomination** and validation of the importance of this technology for the care of newborns." She went on to state that "understanding an infant's brain health is a critical part of treatment decisions. Use of continuous Cerebral Function Monitoring (CFM) provides vital information to clinicians to assist with earlier diagnosis and treatment." The Olympic Brainz Monitor provides aEEG (amplitude integrated EEG), real time EEG to deliver a CFM system designed specifically for monitoring newborns and for use by neonatology.

"This year we saw a number of nominations from many companies new to the competition" said Dallas Advisory Partners Founder, and TechAmerica Foundation Chairman, David Sanders. "We congratulate all of this year's finalists, and look forward to celebrating their achievements with them at the Technology and Government Dinner."

Nominations for The Termans are vetted by industry experts and TechAmerica Foundation leadership. The winners will be presented on June 15 at TechAmerica Foundation's ninth annual Technology and Government Dinner, which has been a premier Washington, DC networking event bringing hundreds of industry, congressional and government leaders together at one venue to celebrate the partnership between industry and government. About TechAmerica Foundation

TechAmerica Foundation educates executives, policymakers, opinion leaders on the size, scope, outlook, and impact of the technology industry and on policies that enable and promote technological innovations to advance prosperity, security, and the general welfare. Launched in 1981, the Foundation is a 501c(3) non-profit affiliate of TechAmerica, which is the leading voice and resource for the U.S. technology industry. The Foundation disseminates award-winning industry, policy, and market research covering topics such as U.S. competitiveness in a global economy, innovation in government, and other areas of national interest. It also organizes conferences and seminars to explore pertinent issues with government

and industry representatives and to share the Foundation's findings. Learn more about TechAmerica Foundation at www.techamericafoundation.org.

About Natus Medical Incorporated

Natus is a leading provider of healthcare products used for the screening, detection, treatment, monitoring and tracking of common medical ailments in newborn care, hearing impairment, neurological dysfunction, epilepsy, sleep disorders, and balance and mobility disorders. Product offerings include computerized neurodiagnostic systems for audiology, neurology, polysomnography, and neonatology, as well as newborn care products such as hearing screening systems, phototherapy devices for the treatment of newborn jaundice, head-cooling products for the treatment of brain injury in newborns, incubators to control the newborn's environment, and software systems for managing and tracking disorders and diseases for public health laboratories.
